SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE

NOTICE

While reasonable efforts have been made to assure the accuracy of this document, Telit assumes no liability resulting from any inaccuracies or omissions in this document, or from use of the information obtained herein. The information in this document has been carefully checked and is believed to be reliable. However, no responsibility is assumed for inaccuracies or omissions. Telit reserves the right to make changes to any products described herein and reserves the right to revise this document and to make changes from time to time in content hereof with no obligation to notify any person of revisions or changes. Telit does not assume any liability arising out of the application or use of any product, software, or circuit described herein; neither does it convey license under its patent rights or the rights of others.

It is possible that this publication may contain references to, or information about Telit products (machines and programs), programming, or services that are not announced in your country. Such references or information must not be construed to mean that Telit intends to announce such Telit products, programming, or services in your country.

COPYRIGHTS

This instruction manual and the Telit products described in this instruction manual may be, include or describe copyrighted Telit material, such as computer programs stored in semiconductor memories or other media. Laws in the Italy and other countries preserve for Telit and its licensors certain exclusive rights for copyrighted material, including the exclusive right to copy, reproduce in any form, distribute and make derivative works of the copyrighted material. Accordingly, any copyrighted material of Telit and its licensors contained herein or in the Telit products described in this instruction manual may not be copied, reproduced, distributed, merged or modified in any manner without the express written permission of Telit. Furthermore, the purchase of Telit products shall not be deemed to grant either directly or by implication, estoppel, or otherwise, any license under the copyrights, patents or patent applications of Telit, as arises by operation of law in the sale of a product.

COMPUTER SOFTWARE COPYRIGHTS

The Telit and 3rd Party supplied Software (SW) products described in this instruction manual may include copyrighted Telit and other 3rd Party supplied computer programs stored in semiconductor memories or other media. Laws in the Italy and other countries preserve for Telit and other 3rd Party supplied SW certain exclusive rights for copyrighted computer programs, including the exclusive right to copy or reproduce in any form the copyrighted computer program. Accordingly, any copyrighted Telit or other 3rd Party supplied SW computer programs contained in the Telit products described in this instruction manual may not be copied (reverse engineered) or reproduced in any manner without the express written permission of Telit or the 3rd Party SW supplier. Furthermore, the purchase of Telit products shall not be deemed to grant either directly or by implication, estoppel, or otherwise, any license under the copyrights, patents or patent applications of Telit or other 3rd Party supplied SW, except for the normal non-exclusive, royalty free license to use that arises by operation of law in the sale of a product.

USAGE AND DISCLOSURE RESTRICTIONS

I. License Agreements

The software described in this document is the property of Telit and its licensors. It is furnished by express license agreement only and may be used only in accordance with the terms of such an agreement.

II. Copyrighted Materials

Software and documentation are copyrighted materials. Making unauthorized copies is prohibited by law. No part of the software or documentation may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language or computer language, in any form or by any means, without prior written permission of Telit

III. High Risk Materials

Components, units, or third-party products used in the product described herein are NOT fault-tolerant and are NOT designed, manufactured, or intended for use as on-line control equipment in the following hazardous environments requiring fail-safe controls: the operation of Nuclear Facilities, Aircraft Navigation or Aircraft Communication Systems, Air Traffic Control, Life Support, or Weapons Systems (High Risk Activities"). Telit and its supplier(s) specifically disclaim any expressed or implied warranty of fitness for such High Risk Activities.

IV. Trademarks

TELIT and the Stylized T Logo are registered in Trademark Office. All other product or service names are the property of their respective owners.

V. Third Party Rights

The software may include Third Party Right software. In this case you agree to comply with all terms and conditions imposed on you in respect of such separate software. In addition to Third Party Terms, the disclaimer of warranty and limitation of liability provisions in this License shall apply to the Third Party Right software.

TELIT HEREBY DISCLAIMS ANY AND ALL WARRANTIES EXPRESS OR IMPLIED FROM ANY THIRD PARTIES REGARDING ANY SEPARATE FILES, ANY THIRD PARTY MATERIALS INCLUDED IN THE SOFTWARE, ANY THIRD PARTY MATERIALS FROM WHICH THE SOFTWARE IS DERIVED (COLLECTIVELY “OTHER CODE”), AND THE USE OF ANY OR ALL THE OTHER CODE IN CONNECTION WITH THE SOFTWARE, INCLUDING (WITHOUT LIMITATION) ANY WARRANTIES OF SATISFACTORY QUALITY OR FITNESS FOR A PARTICULAR PURPOSE.

NO THIRD PARTY LICENSORS OF OTHER CODE SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND WHETHER MADE UNDER CONTRACT, TORT OR OTHER LEGAL THEORY, ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE OTHER CODE OR THE EXERCISE OF ANY RIGHTS GRANTED UNDER EITHER OR BOTH THIS LICENSE AND THE LEGAL TERMS APPLICABLE TO ANY SEPARATE FILES, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Contents

1. INTRODUCTION

1.1. Scope

The Aim of this document is the handling description of the Interfaces for the products based on xE310 form factor.

1.2. Audience

This document is intended for Telit customers, especially system integrators, about to implement their applications using the Telit module.

1.3. Contact Information, Support

For general contact, technical support services, technical questions and report documentation errors contact Telit Technical Support at:

- TS-EMEA@telit.com
- TS-AMERICAS@telit.com
- TS-APAC@telit.com
- TS-SRD@telit.com

Alternatively, use:

http://www.telit.com/support

For detailed information about where you can buy the Telit modules or for recommendations on accessories and components visit:

http://www.telit.com

Our aim is to make this guide as helpful as possible. Keep us informed of your comments and suggestions for improvements.

Telit appreciates feedback from the users of our information.

1.4. Text Conventions

Danger – This information MUST be followed or catastrophic equipment failure or bodily injury may occur.

Caution or Warning – Alerts the user to important points about integrating the module, if these points are not followed, the module and end user equipment may fail or malfunction.

Tip or Information – Provides advice and suggestions that may be useful when integrating the module.

All dates are in ISO 8601 format, i.e. YYYY-MM-DD.

1.5. Related Documents

2. OVERVIEW

The Telit Evaluation Kit (EVK2) provides a robust, future-proof and flexible environment to streamline all application development based on Telit GSM/GPRS, UMTS/HSPA, CDMA 1x/EV-DO, and LTE module families, significantly reducing time-to-market.

The EVK2 kit includes a motherboard where to connect the Interface board of a Telit module.

This concept allows the EVK2 to be used across various form factors and product generations, both present and future.

The motherboard includes the basic interfaces such as power input, SIM card holder, audio monitor outputs, RS-232, and USB; as well as a Reset button and power switch.

The circuit implemented in the EVK2 motherboard is based on the recommended reference design for the module's peripheral components and I/O connections.

Adapter boards are available for all the different module families.

The interface boards convert the module connection technology (board-to-board or BGA soldering) into a PTH pin connector. The part of the basic interfaces is served by the motherboard, whereas specific interfaces according to the type of the module (antenna, general purpose inputs/outputs GPIO, ADC/DAC, UART) are available on the adapter board to connect it to the user applications, extension boards, measurements equipment or other tools.

All connections are made through 2x40 contacts connectors.

It is possible to use these Interface Boards also in stand-alone mode, inserting the “not mounted” components (related to RESET BUTTON, ON BUTTON, SIM HOLDER and STATUS LED functions) plus the use of an external level translator circuit.

This document is describing the available Adapter Boards for the modules based on the xE866 form factor.

NOTICE:

The information presented in this document is believed to be accurate and reliable. However, no responsibility is assumed by Telit Communications S.p.A. for its use, nor any infringement of patents or other rights of third parties which may result from its use. No license is granted by implication or otherwise under any patent rights of Telit Communications S.p.A. other than for circuitry embodied in Telit products. This document is subject to change without notice.

3. GE310 INTERFACE FOR EVK2

3.1. Description

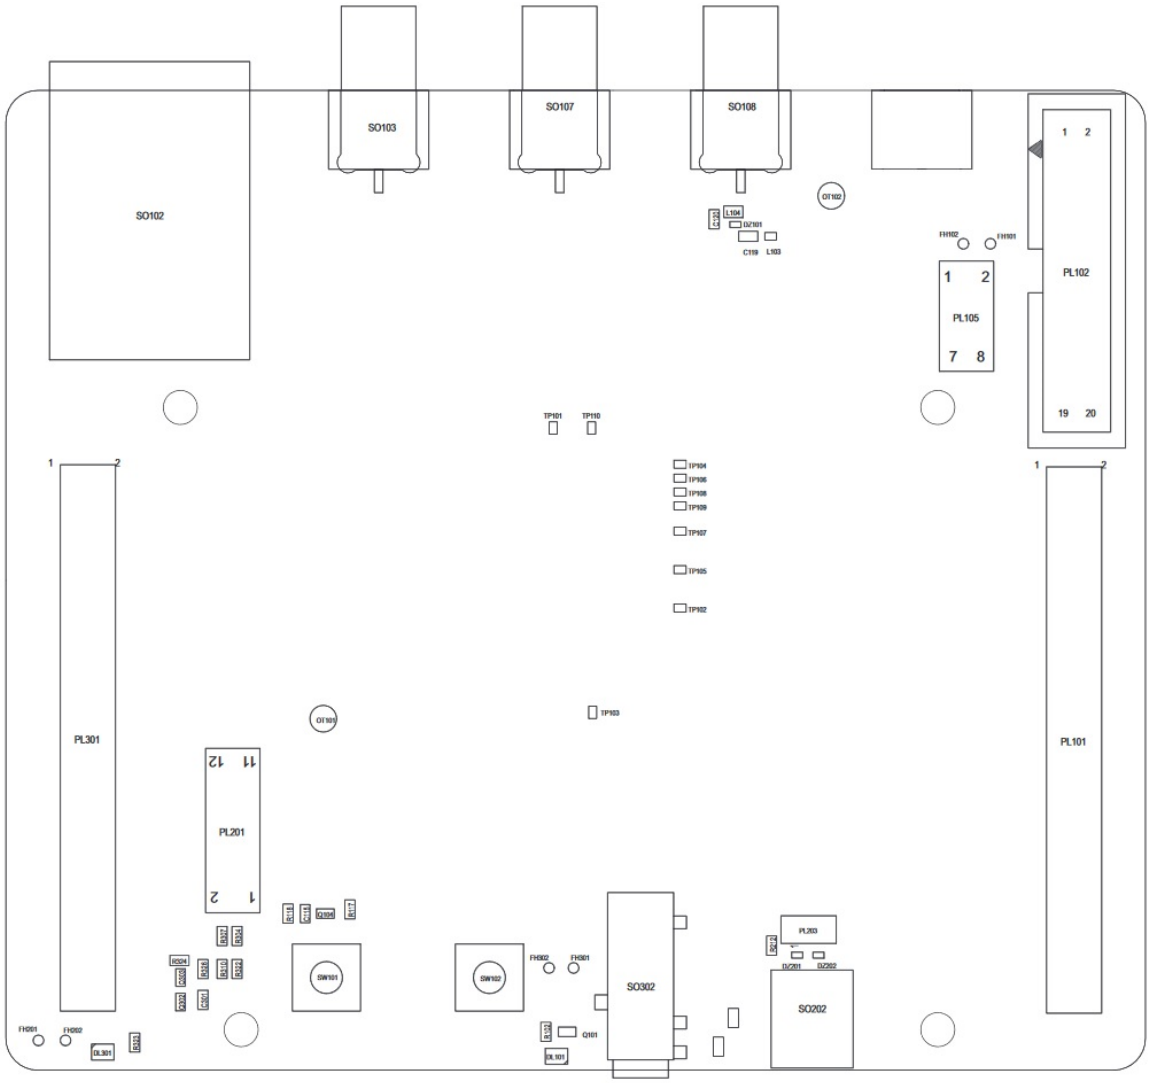
This board allows easily interfacing the GE310 modules with the EVK2 and testing their functionalities.

3.2. Physical Dimensions

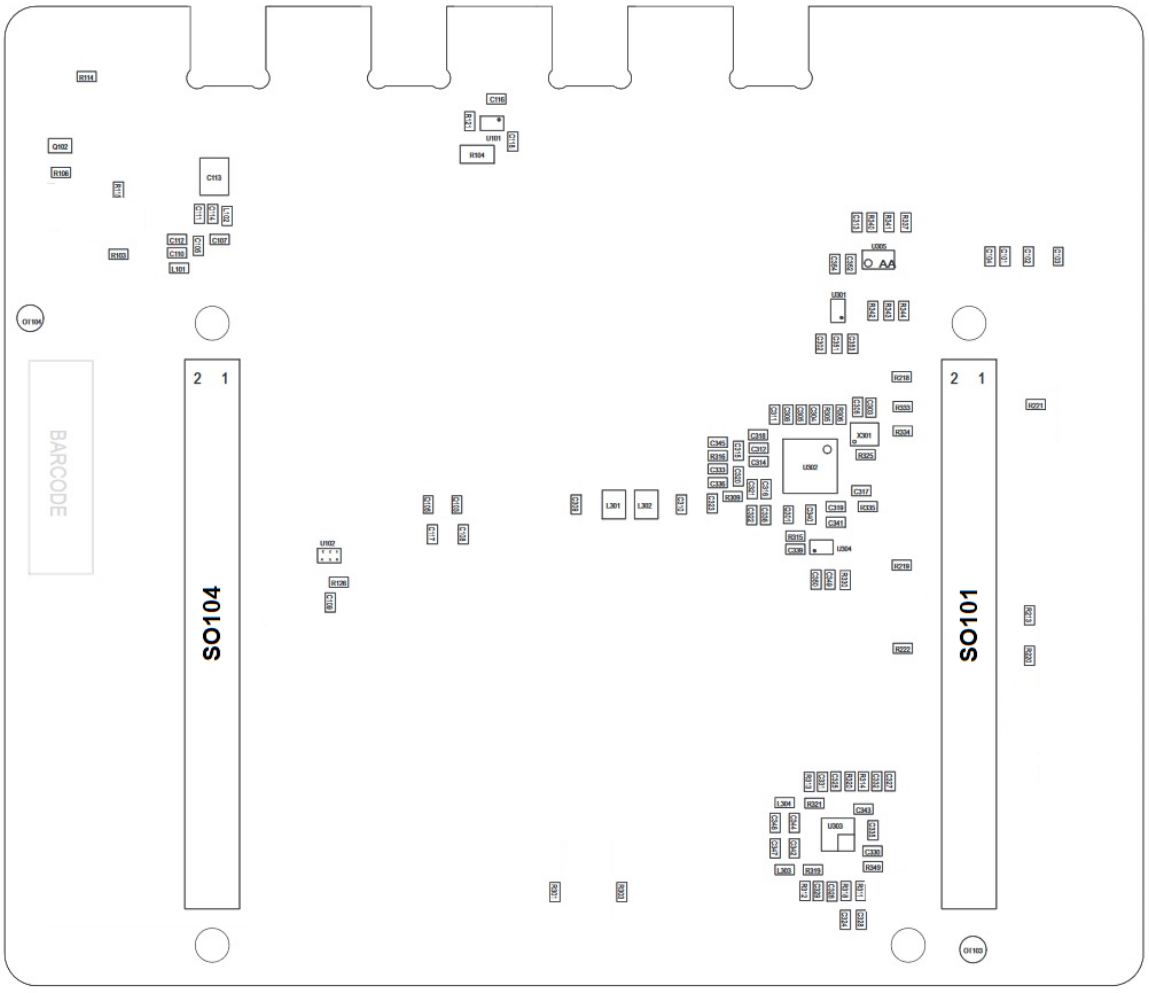
Item	Value
Length	100 mm
Width	107 mm
Height	25 mm

3.3. Interface Details

3.3.1. Connectors Position



TOP SIDE

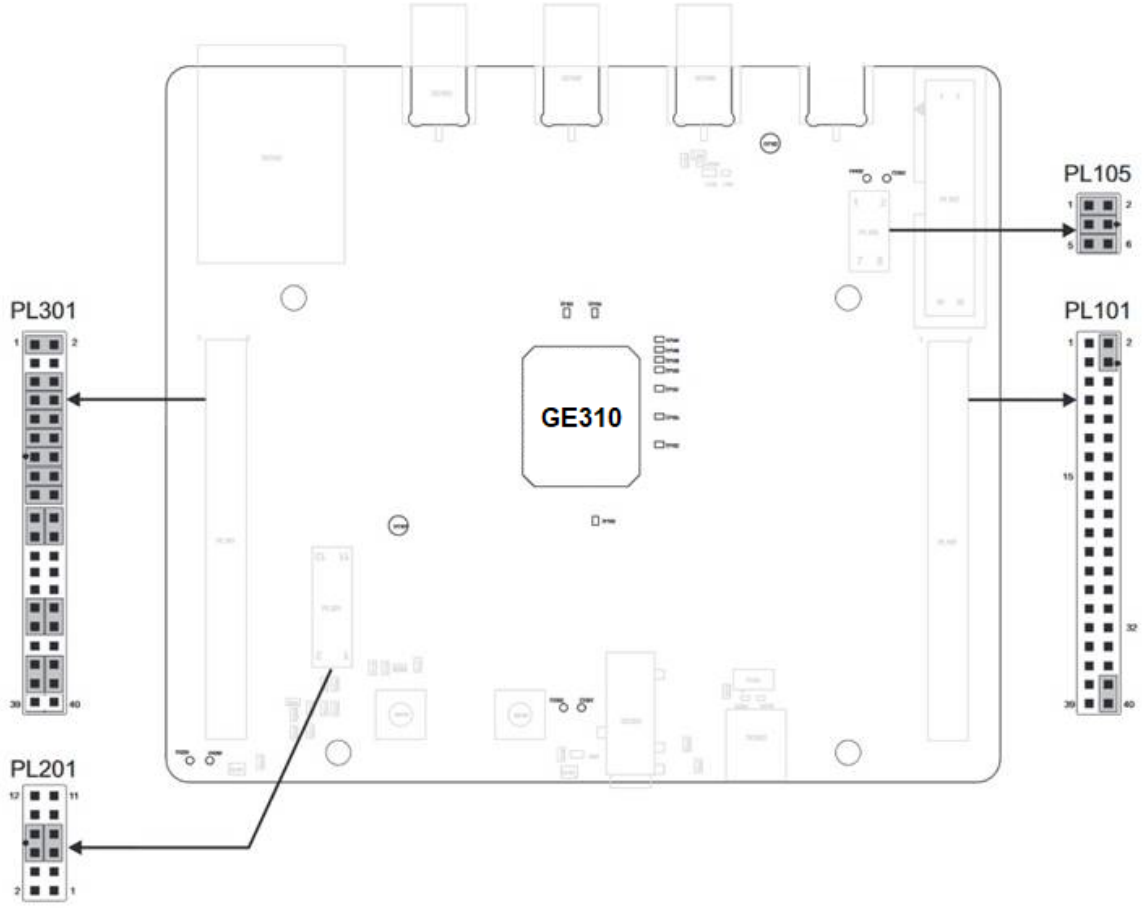


BOTTOM SIDE

3.3.2. Jumpers Setting

The following picture shows the jumpers placement and their default settings.

Details in the following paragraphs.



3.3.3. SO101 & SO104 – EVK2 Connection

The connections between the Interface and the EVK2 is done through two 2x40 pin female connectors present on the bottom (SO101 and SO104). Theirs pin functions are listed in the following tables:

SO101

Pin	Signal	Type	Function
1	NC	-	Do not connect
2	TX_Aux	Digital Output	to RS232 or USB level translators
3	RX_Aux	Digital Input	from RS232 or USB level translators
4	I2C_SDA	Digital	
5	GND	DC Supply	Power
6	I2C_SDA	Digital	
7	NC	-	Do not connect
8	NC	-	Do not connect
9	NC	-	Do not connect
10	NC	-	Do not connect
11	GND	DC Supply	Power
12	GND	DC Supply	Power
13	GND	DC Supply	Power
14	GND	DC Supply	Power
15	NC	-	Do not connect
16	C104/RXD0	Digital Output	to RS232 or USB level translator
17	C103/TXD0	Digital Input	from RS232 or USB level translator
18	NC	-	Do not connect

19	GND	DC voltage	Power
20	NC	-	Do not connect
21	C105/RTS0	Digital Input	from RS232 or USB level translator
22	C106/CTS0	Digital Output	to RS232 or USB level translator
23	NC	-	Do not connect
24	NC	-	Do not connect
25	GND	DC voltage	Power
26	GND	DC voltage	Power
27	GND	DC voltage	Power
28	GND	DC voltage	Power
29	EAR_HF+	AC Out Voltage	Audio
30	EAR_MT-	AC Out Voltage	Audio
31	EAR_HF-	AC Out Voltage	Audio
32	EAR_MT+	AC Out Voltage	Audio
33	NC	-	Do not connect
34	MIC_HF-	AC In Voltage	Audio
35	MIC_MT+	AC In Voltage	Audio
36	MIC_HF+	AC In Voltage	Audio
37	MIC_MT-	AC In Voltage	Audio
38	GND	DC voltage	Power
39	GND	DC voltage	Power
40	GND	DC voltage	Power

SO104

Pin	Signal	Type	Function
1	VBATT_PA	DC Supply	Power
2	VBATT_PA	DC Supply	Power
3	VBATT_AUX	DC Supply	Power
4	VBATT	DC Supply	Power
5	GND	DC Supply	Power
6	GND	DC Supply	Power
7	GND	DC Supply	Power
8	GND	DC Supply	Power
9	NC	-	Do not connect
10	NC	-	Do not connect
11	GND	DC Supply	Power
12	GND	DC Supply	Power
13	GND	DC Supply	Power
14	GND	DC Supply	Power
15	RESERVED	-	
16	NC	-	Do not connect
17	RESET*	Digital Signal	Module Reset
18	NC	-	Do not connect
19	NC	-	Do not connect
20	NC	-	Do not connect

21	STAT_LED	Digital Signal	Status Indicator LED
22	NC	-	Do not connect
23	NC	-	Do not connect
24	NC	-	Do not connect
25	GND	DC Supply	Power
26	GND	DC Supply	Power
27	GND	DC Supply	Power
28	GND	DC Supply	Power
29	NC	-	Do not connect
30	NC	-	Do not connect
31	SIMIO	Digital Signal	SIM Data I/O
32	SIMCLK	Digital Signal	SIM Clock
33	SIMRST	Digital Signal	SIM Reset
34	SIMVCC	DC voltage	SIM Power
35	SIMIN	Digital Signal	SIM Presence detector
36	NC	-	Do not connect
37	NC	-	Do not connect
38	NC	-	Do not connect
39	GND	DC Supply	Power
40	GND	DC Supply	Power

3.3.4. Antenna Connectors

3.3.4.1. SO103 – MAIN Antenna Connector

The MAIN 2G Antenna is available on SO103 and it is a female SMA connector.

A 2G compatible antenna (Refer to the product's HW Design guide) must be connected to SO103.

3.3.4.2. SO107 – Bluetooth Antenna Connector

The Bluetooth Antenna is available on SO107 and it is a female SMA connector.

A BT compatible antenna (Refer to the product's HW Design guide) has to be used.

3.3.4.3. SO108 – GNSS Antenna Connector

The GNSS Antenna is available on SO108 and it is a female SMA connector.

A GNSS compatible antenna (Refer to the product's HW Design guide) has to be used.

3.3.5. PL105 - Power Supply Setting

The PL105 connector is permitting to configure how to supply the module.

The Interface is designed to supply and filter the two Module's inputs VBATT and VBATT_PA and separately the rest of circuits of the Interface (VBATT_AUX)

The connector is provided by 3 Jumpers (Mounted by default) that permits to:

- Select if to supply the module from EVK2 or from an external source
- Insert a Power consumption Meter in series to the supply

The connector carries the following signals:

PL105

Pin	Signal	Function
1	VBATT_PA (Module)	Module's VBATT_PA signal
2	VBATT_PA (EVK2)	VBATT_PA from the EVK2
3	VBATT (Module)	Module's VBATT signal
4	VBATT (EVK2)	VBATT from the EVK2
5	VBATT_AUX (Interface)	Supply input for the Interface circuits (except the module)
6	VBATT_AUX (EVK2)	VBATT_AUX from the EVK2 usable to supply the Interface's circuit.

3.3.6. SIM Holder and SIM Detection

The Interface is provided by a SIM Holder (SO102).

The SIM holder lines are in parallel to the lines connected to the SIM Holder on EVK2 so it is not allowed to have a SIM in both holders.

Due to the fact the product is not provided by a dedicated pin for the HW SIM Presence detection, it is possible to select one GPIO to be used for this function.

On the interface it has been considered to have the possibility to use the GPIO 4 adding a Jumper on PL301.

On PL301 the lines dedicated to this activity are:

Pin	Signal	Function
5	GPIO_04	GPIO_04 on module
6	SIM_IN	SIMIN Line from SIM Holder SO102

3.3.7. RESET

The Interface is provided by a button that permits to RESET the module.

Please refer to the Module's HW user guide for its use and behaviour.

3.3.8. STAT LED

The Interface is provided by a LED controlled by the STAT LED line of the module.

Please refer to the Module's HW user guide for its use and behaviour.

3.3.9. Expansion Connectors

3.3.9.1. PL101

The connector carries the following signals:

Pin	Signal	Function
1	VBATT_AUX	Interface Power supply
2	GNSS_ON	GNSS_ON signal
3	NC	
4	GPIO_06	General Purpose IO #6
5	GPIO_05	General Purpose IO #5
6	NC	
7	GPIO_04	General Purpose IO #4
8	GPIO_03	General Purpose IO #3
9	GPIO_02	General Purpose IO #2
10	GPIO_01	General Purpose IO #1
11	Reserved	Reserved
12	GND	Ground
13	Reserved	Reserved
14	NC	
15	Reserved	Reserved
16	Reserved	Reserved
17	Reserved	Reserved
18	Reserved	Reserved
19	ALARM	ALARM output from Module

20	1PPS	1PPS output from Module
21	Reserved	Reserved
22	Reserved	Reserved
23	VAUX/PWRMON	VAUX/PWRMON from module
24	DAC	Digital to Analog converter output from module
25	Reserved	Reserved
26	ADC	Analog to Digital converter
27	ON_OFF	Module's ON_OFF line
28	NC	
29	GPIO_06	GPIO
30	GPIO_05	GPIO
31	GND	Ground
32	Reserved	Reserved
33	Reserved	Reserved
34	Reserved	Reserved
35	Reserved	Reserved
36	Reserved	Reserved
37	NC	
38	GNSS_LNA_EN	Module's output line to control the external GNSS LNA Enable
39	VBATT_AUX	VBATT supply for Interface
40	LNA SUPPLY EN	Enable line for the GNSS LNA supply

3.3.9.2. PL201

The connector carries the following signals:

Pin	Signal	Function
1	C104/RXD1	SECONDARY UART RX (Output from Module)
2	C103/TXD1	SECONDARY UART RX (Input to Module)
3	TX_TRACE_EVK2	AUX UART RX Input to Level Adapter)
4	RX_TRACE_EVK2	AUX UART RX (Output from Level Adapter)
5	TX_GNSS	GNSS UART TX
6	RX_GNSS	GNSS UART RX
7	C103/TXD1	SECONDARY UART RX (Input to Module)
8	C104/RXD1	SECONDARY UART RX (Output from Module)
9	NC	
10	NC	
11	NC	
12	NC	

There are two Jumpers on this connector that permit to select the following:

- To connect the Secondary UART to the GNSS UART (Hosted configuration) (5-7 and 6-8)
- To connect the Secondary UART to the EVK2 level translators (1-3 and 2-4)
- To connect the GNSS UART to the EVK2 level translators (5-7 and 6-8)

In case is needed to connect an external application to the AUX UART , GNSS UART or simply to isolate them from the rest of the circuitry it is only needed to remove the two jumpers.

3.3.10. Audio Section and Settings

The GE310-GNSS is provided by an Analog Audio line (MIC and SPKR)

3.3.10.1. Audio Settings

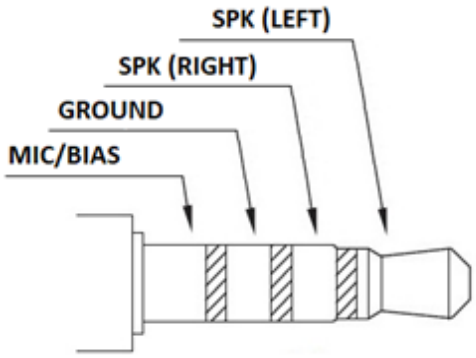
The Interface Board is provided by a set of possible Audio inputs to interface the Audio circuitry of GE310

Its configuration could be set using the Jumpers on PL301.

You could refer to the “PL301 - Audio Settings” paragraph for the details.

3.3.10.1.1. MIC/SPK connector

A MIC/SPK headset could be connected using the SO301 connector (Jack 3.5mm) where the contacts are described in the following Image:



3.3.10.2. PL301 – Audio Settings

The Audio Configuration could be done using the Jumpers on PL301.

3.3.10.2.1. Audio Path Settings

Audio Uplink Setting on PL301

Jumpers on Pin	Signal	Description
19-21 **20-22**	MIC- (Modem) MIC+ (Modem)	From SO301 to Module
25-27 **26-28**	MIC- (Modem) MIC+ (Modem)	From SO301 to Module

Audio DOWNLINK Setting on PL301

Jumpers on Pin	Signal	Description
29-31 **30-32**	SPK+ (Modem)	From Module to SO301
35-37 **36-38**	SPK- (Modem)	From Module to SO301

3.4. GNSS Settings

The GE310-GNSS module is provided by a GNSS receiver.

The interface is permitting to connect and supply an external active antenna and also to set the module in the different working modes.

3.4.1. GNSS Signals

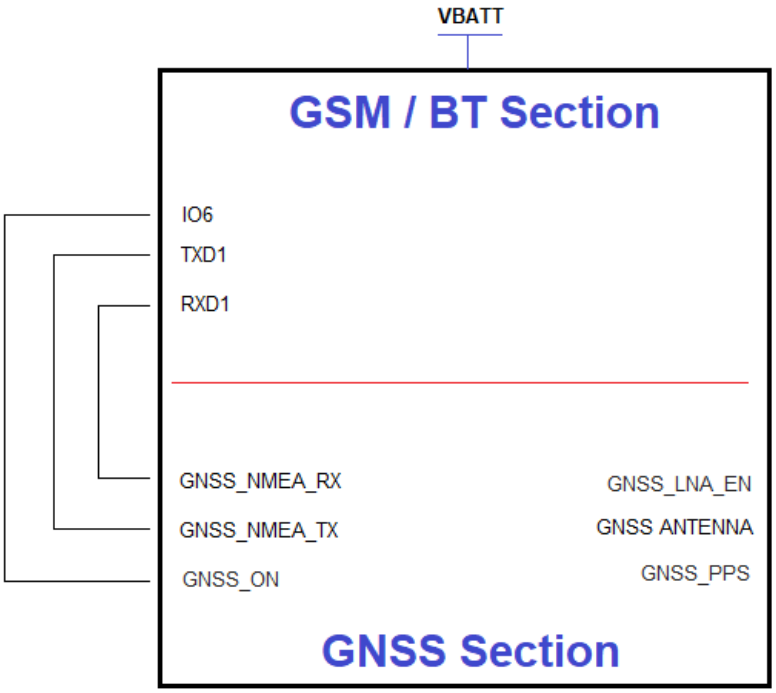
The GE310 is including the following signals usable with the GNSS section:

Pin	Signal	I/O	Function	Type	Comment
Asynchronous Serial Port (USIF1)					
Y12	TXD1	I	Serial data input (TXD) from DTE	CMOS 2.8V	
AA11	RXD1	O	Serial data output (RXD) to DTE	CMOS 2.8V	
GNSS Serial Port					
Y10	GNSS_NMEA_TX	O	GNSS UART UART (TX Data to DTE)	CMOS 2.8V	
AA9	GNSS_NMEA_RX	I	GNSS UART (RX Data from DTE)	CMOS 2.8V	
DIGITAL IO					
D13	IO6	I/O	Configurable GPIO06	CMOS 2.8V	Usable to control GNSS_ON
GNSS Control Signals					
H18	GNSS_LNA_EN	O	GNSS external LNA enable	CMOS 2.8V	Used to enable the external LNA supply
J16	GNSS_ON	I	GNSS Receiver Enable	CMOS 2.8V	
G16	GNSS_PPS	O	1 Pulse per Second	CMOS 2.8V	
RF Section					
E19	GNSS ANTENNA	I	GNSS Antenna	RF	

3.4.2. Hosted GNSS Settings

As described in HW User Guide the GE310-GNSS module permits to use the GNSS section as host for the 2G section or as a separated device.

The Hosted configuration could be set in the following way:



3.5. Interface Stand-alone Use

The GE310 Interface could be used in Stand alone (without the EVK2 mainboard) with the following remarks:

- The Power supply could be provided connecting a Power supply to SO104 or PL105 (removing the Jumpers)
- The Power supply level has to be carefully verified in the Module's HW User Guide
- The SIM could be inserted in the SO102 Holder
- The communication with the module through the UART requires the use of a level adapter between the PC and the Interface (the lines are available on SO101 but please be aware that the signals on that connector have been adapted to the 2.8V logic levels of EVK2)
- The Audio section could be used accessing directly to the Analog lines (see above chapters for pinout) or through the codec using SO301 and SO302
- The RESET line could be controlled using the SW101 Button
- The STAT LED line is present on the Interface (DL101)
- The Antenna could be connected on the related SMA connectors (Ref to Module's HW User Guide for the correct model)

3.6. FIRMWARE UPDATE

You can update the Telit Module firmware through the serial port.

In case the GNSS section needs a SW upgrade this could be done setting the Interface in this way:

- PL101: Jumper Between Pin 2 and Pin 4.
- PL201: Jumper Between Pin 5 and Pin 7 and Jumper between Pin 6 and Pin 8.

Please refer to the GE310 HW Design Guide Documentation for details.

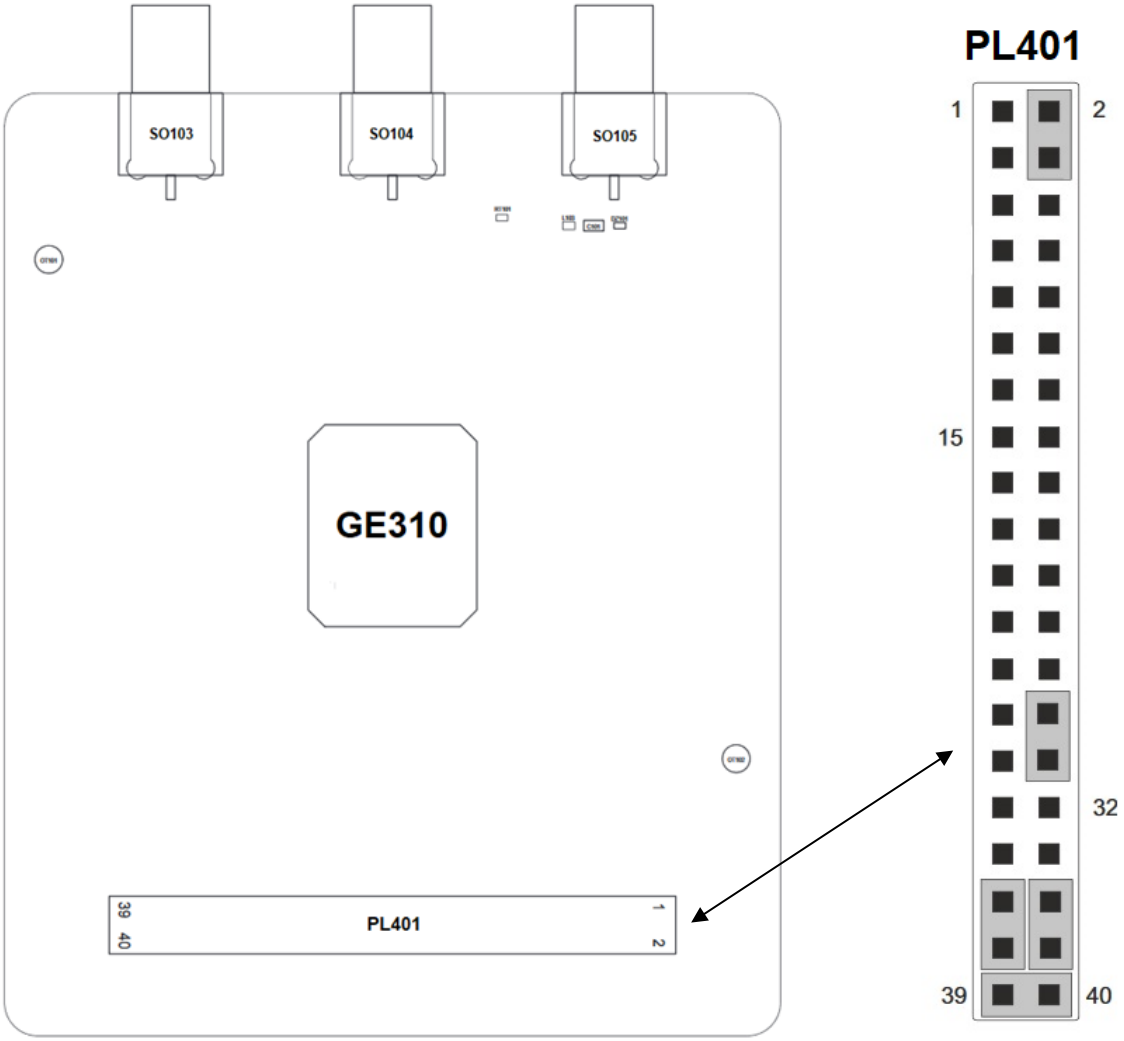
4.3.2. Jumpers Setting

The following picture shows the jumpers placement and their default settings.

Details in the following paragraphs.



4.3.3. PL101, PL102, PL103 – EVB Connection

The connections between the Interface and the EVB is done through three 6x20 pin connectors present on the bottom (PL101, PL102 and PL103).

The connector is a Semtec SEAM Series - .050" (1.27 mm) High Speed/High Density Open Pin Field with p/n is SEAM-20-03.5-L-06-2-A-K-TR

Theirs pin functions are listed in the following tables:

4.3.4. Antenna Connectors

4.3.4.1. SO103 – MAIN Antenna Connector

The MAIN 2G Antenna is available on SO103 and it is a female SMA connector.

A 2G compatible antenna (Refer to the product's HW Design guide) must be connected to SO103.

4.3.4.2. SO104 – Bluetooth Antenna Connector

The Bluetooth Antenna is available on SO104 and it is a female SMA connector.

A BT compatible antenna (Refer to the product's HW Design guide) has to be used.

4.3.4.3. SO105 – GNSS Antenna Connector

The GNSS Antenna is available on SO105 and it is a female SMA connector.

A GNSS compatible antenna (Refer to the product's HW Design guide) has to be used.

4.3.5. SIM Holder and SIM Detection

The Interface is using the SIM Holder available on the EVB mainboard.

Due to the fact the product is not provided by a dedicated pin for the HW SIM Presence detection, it is possible to select one GPIO to be used for this function.

On the interface it has been considered to have the possibility to use the GPIO_05 adding a Jumper on PL401.

On PL401 the lines dedicated to this activity are:

Pin	Signal	Function
39	GPIO_04	GPIO_04 on module
40	SIM_IN	SIMIN Line from EVB SIM Holder

4.3.6. RESET

The module could be reset using the related button on EVB mainboard.

4.3.7. STAT LED

The EVB Interface is provided by a LED controlled by the STAT LED line of the module.

Please refer to the Module's HW user guide for its use and behaviour.

4.3.8. Expansion Connectors

4.3.8.1. PL401

The connector carries the following signals:

Pin	Signal	Function
1	VBATT_AUX	Interface Power supply
2	GNSS_ON	GNSS_ON signal
3	NC	
4	GPIO_06	General Purpose IO #6
5	GPIO_05	General Purpose IO #5
6	NC	
7	GPIO_04	General Purpose IO #4
8	GPIO_03	General Purpose IO #3
9	GPIO_02	General Purpose IO #2
10	GPIO_01	General Purpose IO #1
11	Reserved	Reserved
12	GND	Ground
13	Reserved	Reserved
14	ALARM	ALARM output from Module
15	1PPS	PPS output signal from GNSS receiver
16	Reserved	Reserved
17	Reserved	Reserved
18	VAUX/PWRMON	VAUX/PWRMON from module
19	Reserved	Reserved

20	CTS0	Output for Clear to send signal (CTS) to DTE (Main UART)
21	RTS0	Input for Request to send signal (RTS) from DTE (Main UART)
22	GND	Ground
23	Reserved	Reserved
24	Reserved	Reserved
25	Reserved	Reserved
26	Reserved	Reserved
27	Reserved	Reserved
28	GNSS_LNA_EN	GNSS external LNA enable
29	VBATT_AUX	VBATT input to supply the Interface circuitery
30	GNSS_LNA_EN_EVB	GNSS LNA enable line from EVB
31	RXD0	Serial data output (RXD) to DTE (Main UART)
32	TXD0	Serial data input (TXD) from DTE (Main UART)
33	RXD1	Serial data output (RXD) to DTE (Secondary UART)
34	TXD1	Serial data input (TXD) from DTE (Secondary UART)
35	GNSS_NMEA_RX	GNSS UART (RX Data from DTE)
36	GNSS_NMEA_TX	GNSS UART UART (TX Data to DTE)
37	TXD0	Serial data input (TXD) from DTE (Main UART)
38	RXD0	Serial data output (RXD) to DTE (Main UART)
39	GPIO_04	General purpose IO 4
40	SIMIN	SIM detection line from the SIM Holder of EVB

There are two Jumpers on this connector that permit to select the following:

- To connect the Secondary UART to the GNSS UART (Hosted configuration) (35-37 and 36-38)
- To connect the Secondary UART to the EVB level translators (31-33 and 32-34)
- To connect the GNSS UART to the EVK2 level translators (33-35 and 34-36)

In case is needed to connect an external application to the AUX UART , GNSS UART or simply to isolate them from the rest of the circuitry it is only needed to remove the two jumpers.

4.4. GNSS Settings

The GE310-GNSS module is provided by a GNSS receiver.

The interface is permitting to connect and supply an external active antenna and also to set the module in the different working modes.

4.4.1. GNSS Signals

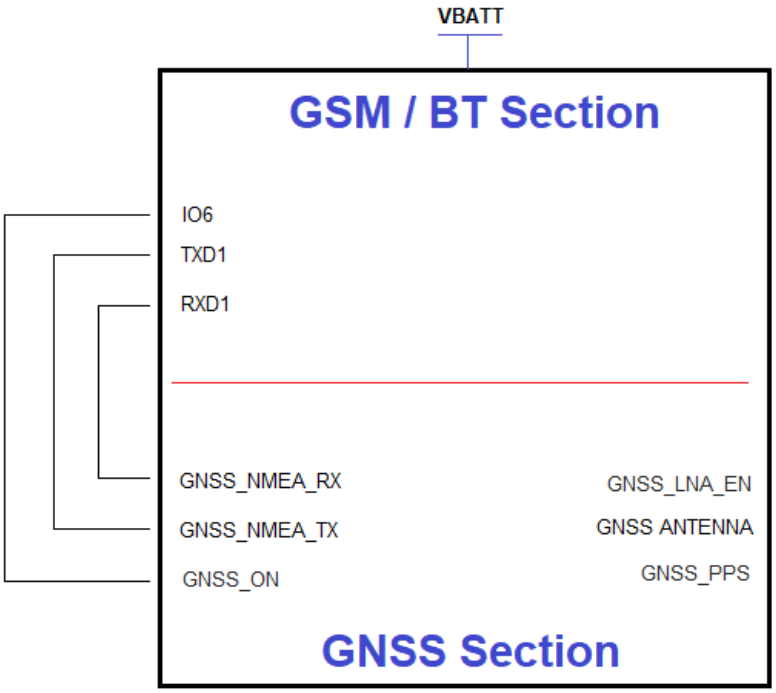
The GE310 is including the following signals usable with the GNSS section:

Pin	Signal	I/O	Function	Type	Comment
Asynchronous Serial Port (USIF1)					
Y12	TXD1	I	Serial data input (TXD) from DTE	CMOS 2.8V	
AA11	RXD1	O	Serial data output (RXD) to DTE	CMOS 2.8V	
GNSS Serial Port					
Y10	GNSS_NMEA_TX	O	GNSS UART UART (TX Data to DTE)	CMOS 2.8V	
AA9	GNSS_NMEA_RX	I	GNSS UART (RX Data from DTE)	CMOS 2.8V	
DIGITAL IO					
D13	IO6	I/O	Configurable GPIO06	CMOS 2.8V	Usable to control GNSS_ON
GNSS Control Signals					
H18	GNSS_LNA_EN	O	GNSS external LNA enable	CMOS 2.8V	Used to enable the external LNA supply
J16	GNSS_ON	I	GNSS Receiver Enable	CMOS 2.8V	
G16	GNSS_PPS	O	1 Pulse per Second	CMOS 2.8V	
RF Section					
E19	GNSS ANTENNA	I	GNSS Antenna	RF	

4.4.2. Hosted GNSS Settings

As described in HW User Guide the GE310-GNSS module permits to use the GNSS section as host for the 2G section or as a separated device.

The Hosted configuration could be set in the following way:



4.5. FIRMWARE UPDATE

You can update the Telit Module firmware through the serial port.

In case the GNSS section needs a SW upgrade this could be done setting the Interface in this way:

PL401: Jumper between Pin 2 and Pin 4, Jumper between Pin 35 and Pin 37 and Jumper between Pin 36 and Pin 38.

Please refer to the GE310 HW Design Guide Documentation for details.

5. ME310G1 TLB INTERFACE FOR EVB

5.1. Description

This board allows easily interfacing the GE310 modules with the Telit Evaluation Board (EVB) and testing their functionalities.

5.2. Physical Dimensions

Item	Value
Length	100 mm
Width	70 mm
Height	25 mm

5.3. Interface Details

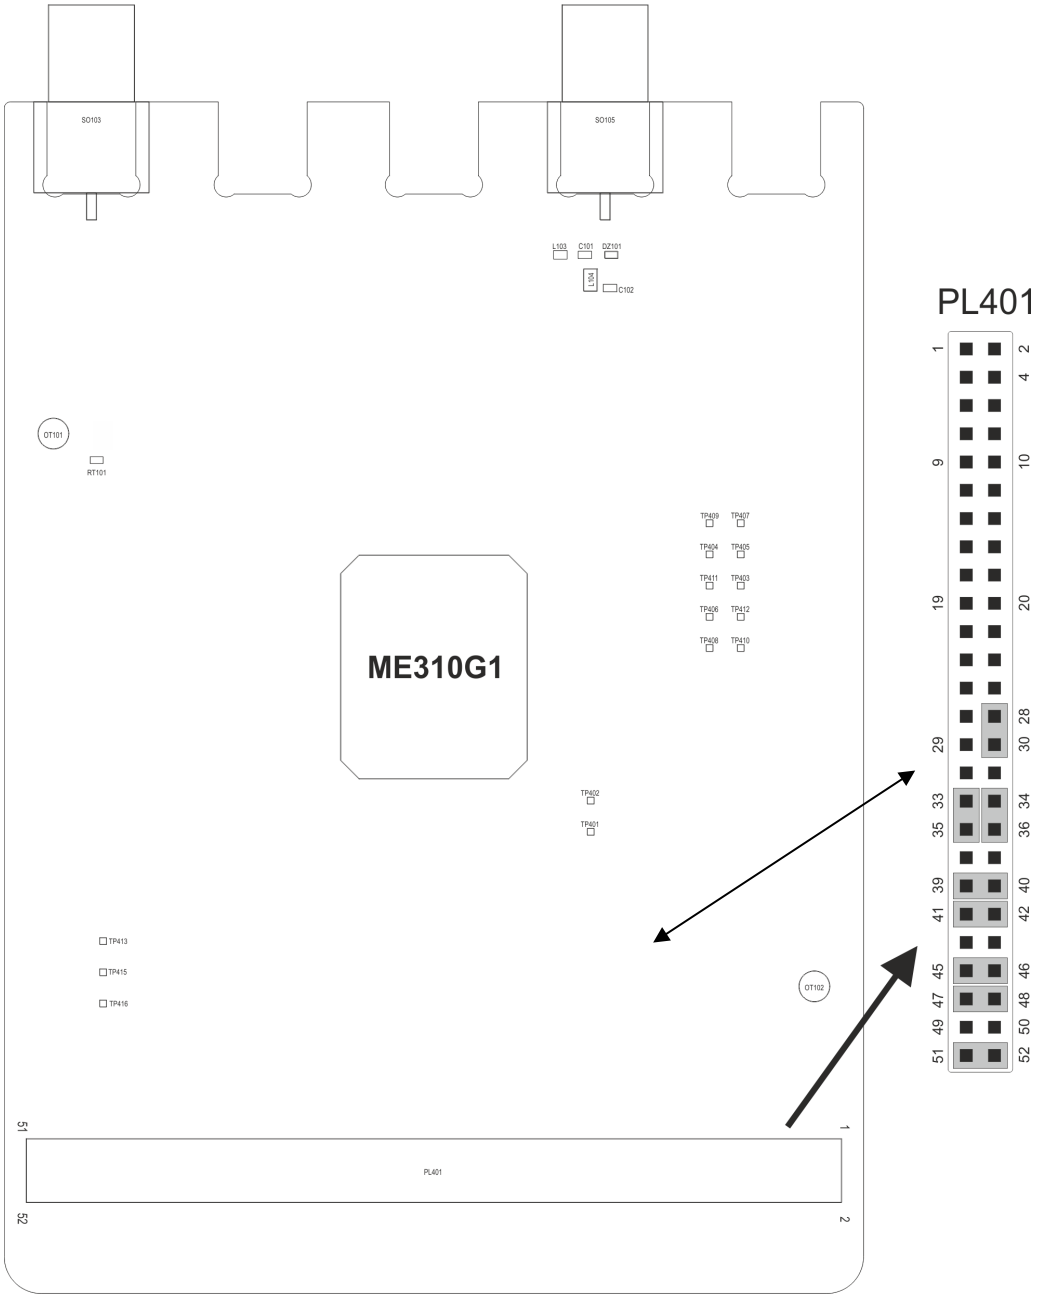
5.3.2. Jumpers Setting

The following picture shows the jumpers placement and their default settings.

Details in the following paragraphs.



5.3.3. PL101, PL102, PL103 – EVB Connection

The connections between the Interface and the EVB is done through three 6x20 pin connectors present on the bottom (PL101, PL102 and PL103).

The connector is a Semtec SEAM Series - .050" (1.27 mm) High Speed/High Density Open Pin Field with p/n is SEAM-20-03.5-L-06-2-A-K-TR

Theirs pin functions are listed in the following tables:

5.3.4. Antenna Connectors

5.3.4.1. SO103 – MAIN Antenna Connector

The MAIN 2G Antenna is available on SO103 and it is a female SMA connector.

A 2G compatible antenna (Refer to the product's HW Design guide) must be connected to SO103.

5.3.4.2. SO105 – GNSS Antenna Connector

The GNSS Antenna is available on SO105 and it is a female SMA connector.

A GNSS compatible antenna (Refer to the product's HW Design guide) has to be used.

5.3.5. STAT LED

The EVB Interface is provided by a LED controlled by the STAT LED line of the module.

Please refer to the Module's HW user guide for its use and behaviour.

5.3.6. Expansion Connectors

5.3.6.1. PL401

The connector carries the following signals:

Pin	Signal	Function
1	VBATT_AUX	Interface Power supply
2	Reserved	Reserved
3	NC	
4	GPIO_06	General Purpose IO #6
5	GPIO_05	General Purpose IO #5
6	NC	
7	GPIO_04	General Purpose IO #4
8	GPIO_03	General Purpose IO #3
9	GPIO_02	General Purpose IO #2
10	GPIO_01	General Purpose IO #1
11	Reserved	Reserved
12	GND	Ground
13	Reserved	Reserved
14	Reserved	Reserved
15	1PPS	PPS output signal from GNSS receiver
16	Reserved	Reserved
17	Reserved	Reserved
18	PWRMON	PWRMON from module
19	Reserved	Reserved

20	CTS1	Output for Clear to send signal (CTS) to DTE (Secondary UART)
21	RTS1	Input for Request to send signal (RTS) from DTE (Secondary UART)
22	GND	Ground
23	Reserved	Reserved
24	Reserved	Reserved
25	Reserved	Reserved
26	Reserved	Reserved
27	Reserved	Reserved
28	GNSS_LNA_EN	GNSS external LNA enable
29	VBATT_AUX	VBATT input to supply the Interface circuitery
30	GNSS_LNA_EN_EVB	GNSS LNA enable line from EVB
31	RXD1	Serial data output (RXD) to DTE (Secondary UART)
32	TXD1	Serial data input (TXD) from DTE (Secondary UART)
33	TX_TRACE_EVB	To EVB
34	RX_TRACE_EVB	To EVB
35	TX_AUX	Auxiliary UART (TX Data to DTE)
36	RX_AUX	Auxiliary UART (RX Data from DTE)
37	TXD1	Serial data input (TXD) from DTE (Secondary UART)
38	RXD1	Serial data output (RXD) to DTE (Secondary UART)
39	GPIO_04	General purpose IO 4
40	Reserved	Reserved
41	RXD	To EVB

42	RXD0	Serial data output (RXD) to DTE (Main UART)
43	RXD1	Serial data output (RXD) to DTE (Secondary UART)
44	CTS1	Output for Clear to send signal (CTS) to DTE (Secondary UART)
45	CTS0	Output for Clear to send signal (CTS) to DTE (Main UART)
46	CTS	To EVB
47	TXD	To EVB
48	TXD0	Serial data input (TXD) from DTE (Main UART)
49	TXD1	Serial data input (TXD) from DTE (Secondary UART)
50	RTS1	Input for Request to send signal (RTS) from DTE (Secondary UART)
51	RTS0	Input for Request to send signal (RTS) from DTE (Main UART)
52	RTS	To EVB

There are Jumpers on this connector that permit to select the following:

- To connect the Main UART (UART0) to EVB level translators (41-42, 45-46, 47-48, 51-52)
- To connect the Secondary UART (UART1) to the EVB level translators (41-43, 44-46, 47-49, 50-52)
- To connect the Auxiliary UART to the EVB level translators (33-35 and 34-36)

In case is needed to connect an external application to the Main UART, Secondary UART , Auxiliary UART or simply to isolate them from the rest of the circuitry it is only needed to remove the jumpers.

7. SAFETY RECOMMENDATIONS

7.1. READ CAREFULLY

Be sure the use of this product is allowed in the country and in the environment required. The use of this product may be dangerous and has to be avoided in the following areas:

- Where it can interfere with other electronic devices in environments such as hospitals, airports, aircrafts, etc.
- Where there is risk of explosion such as gasoline stations, oil refineries, etc. It is the responsibility of the user to enforce the country regulation and the specific environment regulation.

Do not disassemble the product; any mark of tampering will compromise the warranty validity. We recommend following the instructions of the hardware user guides for correct wiring of the product. The product has to be supplied with a stabilized voltage source and the wiring has to be conformed to the security and fire prevention regulations. The product has to be handled with care, avoiding any contact with the pins because electrostatic discharges may damage the product itself. Same cautions have to be taken for the SIM, checking carefully the instruction for its use. Do not insert or remove the SIM when the product is in power saving mode.

The system integrator is responsible for the functioning of the final product; therefore, care has to be taken to the external components of the module, as well as any project or installation issue, because the risk of disturbing the LTE network or external devices or having impact on the security. Should there be any doubt, please refer to the technical documentation and the regulations in force. Every module has to be equipped with a proper antenna with specific characteristics. The antenna has to be installed with care in order to avoid any interference with other electronic devices and has to guarantee a minimum distance from the body (20 cm). In case this requirement cannot be satisfied, the system integrator has to assess the final product against the SAR regulation.

The European Community provides some Directives for the electronic equipment introduced on the market. All of the relevant information is available on the European Community website:

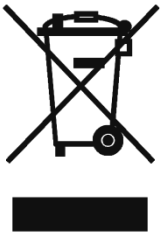
http://ec.europa.eu/enterprise/sectors/rtte/documents/

The text of the Directive 99/05 regarding telecommunication equipment is available,

while the applicable Directives (Low Voltage and EMC) are available at:

http://ec.europa.eu/enterprise/sectors/electrical/

7.2. Disposal of this product in the European Union



According to the WEEE Directive 2012/19/EU, the crossed-out wheeled bin symbol on the product or on its packaging indicates that the product must not be disposed of with your other household waste.
For equipment in private household, it's user's responsibility to dispose of his waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. For more information about where you can drop off your waste equipment from private household for recycling, please contact your local city office, your household waste disposal service or the retailer where you purchased the product. As a producer of electronic devices, TELIT provides for the financing of the treatment and recycling of waste returned through the designated collection points in accordance with local requirements. If you have professional electronic equipment that you purchased directly from TELIT that you wish to have picked up for recycling, please contact us to receive necessary information and instructions. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.

Reference Directives:

2012/19/EU Directive of the European Parliament and of the Council of 4 July 2012 on waste electrical and electronic equipment (WEEE).

7.3. Disposal of this product in other countries outside the European Union

Please dispose of this product in accordance with local requirements; contact your local authorities or dealer and ask for the correct method of disposal.

8. REFERENCE TABLE OF RF BANDS CHARACTERISTICS

Mode	Freq. Tx (MHz)	Freq. Rx (MHz)	Channels	Tx-Rx Offset
PCS 1900	1850.2 ~ 1909.8	1930.2 ~ 1989.8	512 ~ 810	80 MHz
DCS 1800	1710 ~ 1785	1805 ~ 1880	512 ~ 885	95 MHz
GSM 850	824.2 ~ 848.8	869.2 ~ 893.8	128 ~ 251	45 MHz
EGSM 900	890 ~ 915	935 ~ 960	0 ~ 124	45 MHz
	880 ~ 890	925 ~ 935	975 ~ 1023	45 MHz

9. ACRONYMS

TTSC	Telit Technical Support Centre
USB	Universal Serial Bus
HS	High Speed
DTE	Data Terminal Equipment
UMTS	Universal Mobile Telecommunication System
WCDMA	Wideband Code Division Multiple Access
HSDPA	High Speed Downlink Packet Access
